

Square-D Model 6 Handle Size Reference Document

There has been a slight variation to the handle and handle base sizes over the last 12 years for the Square-D Model 6 MCC. Due to this variation, **Martek offers two operators depending on the handle size.** If your MCC was installed prior to 2006, it likely has a handle that is 4.5" in length and will require **LongArm Model SDL6A**. After 2006, most Square-D Model 6 MCC handles were reduced in size to a standard 4" and will require **LongArm Model SDL6C**. The SDL6C is also designed to fit alongside the new Closed Door Racking feature that was introduced in 2017 on the Model 6 MCC. Please take a measurement of your MCC handles to help us ensure we send you the best fitting product. Thank you!

4.5" Handle requires model **SDL6A**.

4" handle requires model **SDL6C**

Please confirm the handle size with your representative or with Martek Ltd. at sales@marteklimited.com
